PROFESSIONAL SUMMARY

A dedicated Full Stack Developer with over two years of experience building dynamic, scalable web applications. Proficient in **Angular** for front-end and **Spring Boot** for back-end development. Expertise in securing APIs with **JWT authentication**, optimizing performance, and delivering high-quality code. Skilled in **microservices architecture**, with hands-on experience in **Docker**, **AWS**, **Gradle**, **Postman**, **Jira**, and **GitHub** to streamline development and ensure smooth project delivery in agile environments.

Technical Skills

Languages: Java, JavaScript, TypeScript
Frameworks: SpringBoot, Angular
DataBases: Oracle, MySql
Development/Build tools: Maven, Gradle, npm, Git, Github, Postman, Jira
IDE: IntelliJ IDEA, Eclipse, Visual Studio Code

Experience

NIQ | **November 2022 – Present**
Software Engineer | *Pune, Maharashtra*

- Developed and maintained scalable web applications using **Angular 17** on the front-end and **Spring Boot 3.3** on the back-end.
- Implemented **JWT**-based authentication for securing APIs, enhancing security and ensuring seamless user authentication.
- Optimized build and deployment processes using **Gradle**, resulting in faster build times and smoother CI/CD integration.
- Designed, tested, and troubleshot REST APIs using **Postman**, ensuring high-quality and bug-free services while collaborating with cross-functional teams and managing tasks through **Jira** and **GitHub**

Education

Sunbeam Institute of Technology | **March 2022 – Oct. 2022**
Post Graduation Diploma in Advanced Computing- **85.50%** | *Pune, Maharashtra*

Sanjay Ghodawat University | **July 2017 – May 2021**
Bachelor of Technology- **76.76%** | *Kolhapur, Maharashtra*

Projects

Recipe Helper | *Spring Boot,Angular* | **October 2024**

- Developed a full-stack **Recipe Helper WebApp** using **Angular** for the front-end and **Spring Boot** for the back-end, enabling users to share recipes on social media, like, and manage them seamlessly
- Implemented **OAuth 2.0 Google login** for secure user sign-in, deployed the application on **AWS** using **Docker** for scalability, and managed project dependencies with **Maven**, integrating CI/CD pipelines for smooth updates and feature deployment.

Insurance Portal | *React, Express Js, Node Js, Spring Boot* | **November 2022**

- Designed and developed a **microservice-based** Insurance Portal using React for the front-end and Express.js, Node.js, and Spring Boot for the back-end, ensuring modular and scalable architecture.
- Integrated **JWT authentication** for secure access to policy management and claims processing, enhancing the overall security of the platform.
- Optimized communication between services and ensured high performance and reliability through efficient API integration and service orchestration.

Certificates

- **Career essentials in Software Development** | Microsoft - June 2024
- **Career essentials in Github Professional** | Github - October 2024
